緑

The diagram shows a 4-line ladder with four horizontal lines: red (top), black (second), black (third), and green (bottom). There are six vertical rungs. Each rung has a circle at the bottom end, connected to the green line. The circles are arranged in a sequence: the first is connected to the red line, the second to the black line, the third to the black line, the fourth to the red line, the fifth to the black line, and the sixth to the green line. The circles are connected to the lines by vertical lines that extend from the rungs.
